

Accessible Community Based Business Ecosystem

Zika Abzuk

Cisco Israel CDA Lead

Initiated and lead the following initiatives:

- Cisco's investment in Palestinian Authority – to enable a new model of job creation
- Cisco's investment in Sub-Saharan Africa – CGI – Connect the unconnected to enable medical and educational services
- Kamatech inclusion of Ultra Orthodox into the High-tech ecosystem
- MaanTech – Inclusion of Israeli Arabs into the Israeli high-tech ecosystem
- MYTecC – A Mediterranean Youth Club
- Net@ - An Israeli youth club across the country

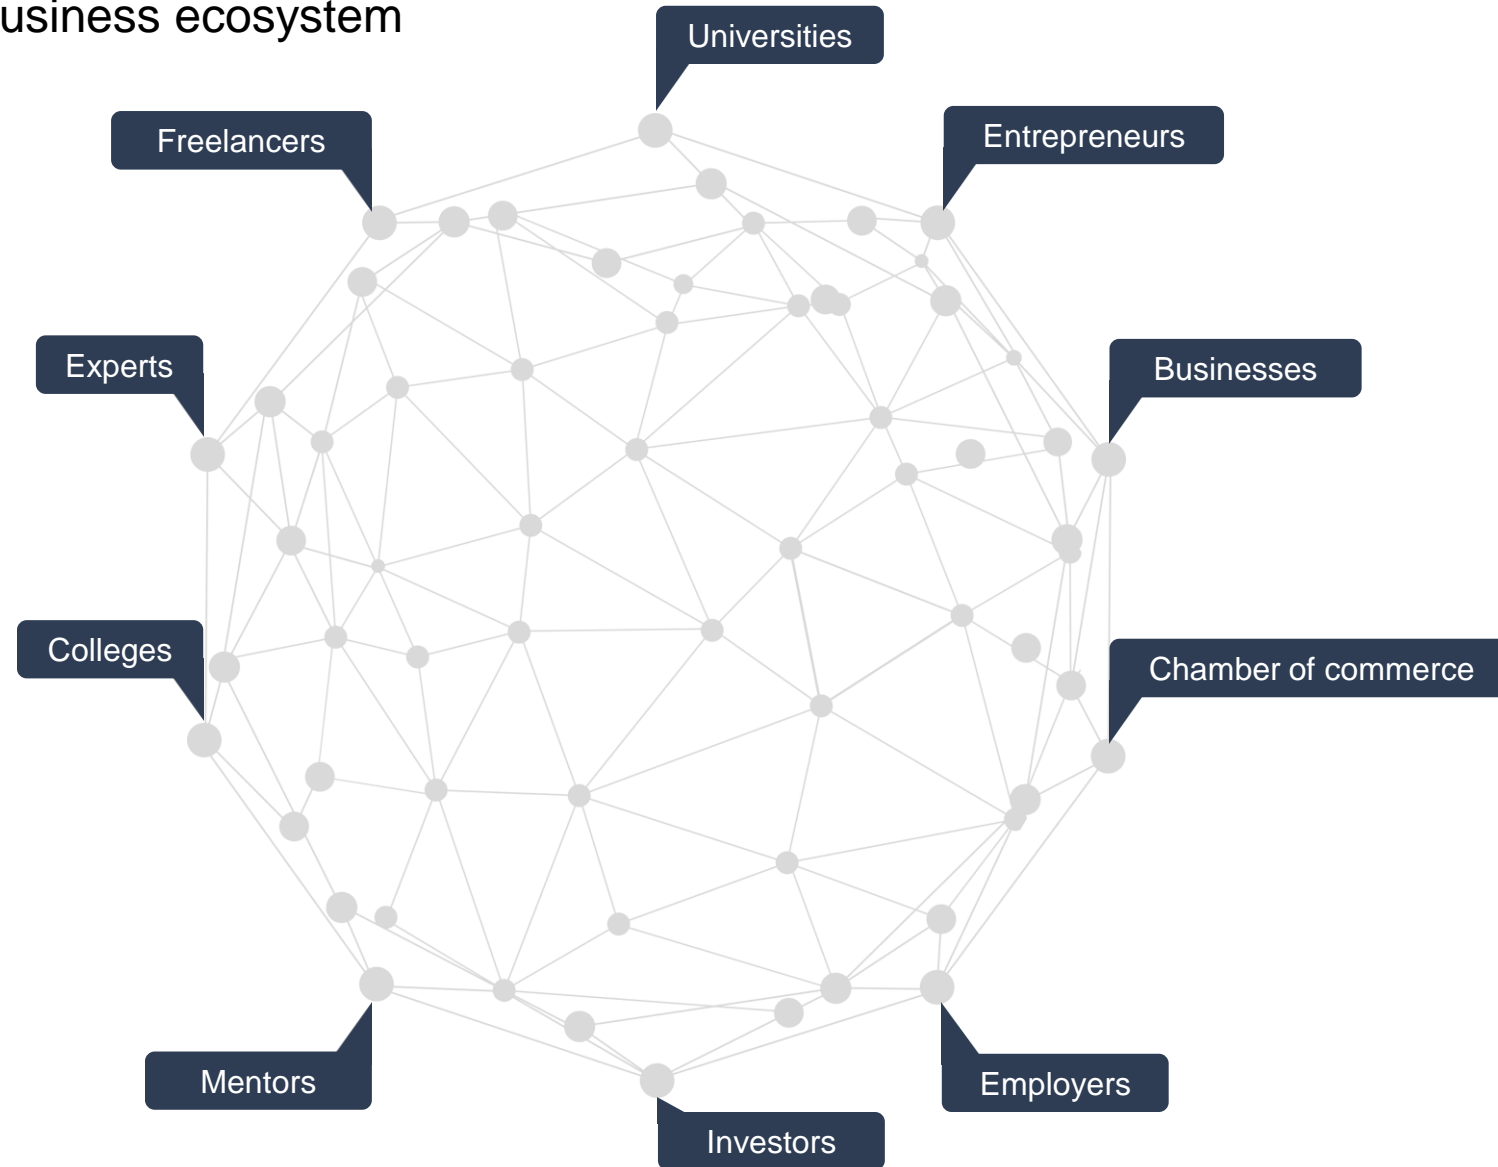

Our Vision

Harness technology to
enable a digitally accessible
business ecosystem for all

The current circumstances

A closed, inaccessible, business ecosystem

The Needs — Three Pillars

The state

- Provide equal opportunity for all
- Prepare workforce for changes in global market
- Lower dependency on social services
- Economic and social stability

Businesses

- Adapt to a new and changing market
- Skilled workforce
- Employees continued development
- Grow Market share

Individuals

- Develop current skills to join workforce
- Network to find a job
- Learn a profession
- Get to know the ecosystem
- Develop a career path

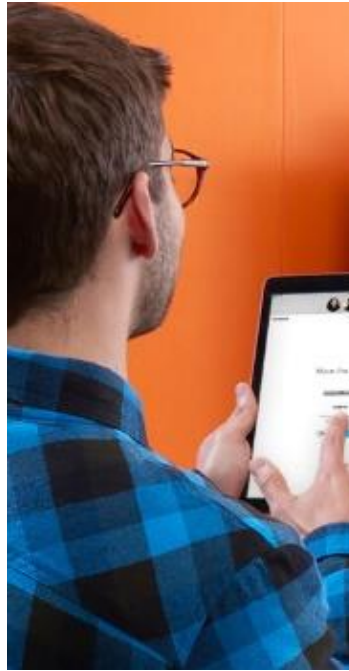

A complete solution for all

Smart Locations

- Open workspaces, including meetings and learning enabling technology
- Currently there are 30 connected smart locations across the country

Partnerships

The solution depends on the creation of meaningful partnerships with:

Content Providers

Colleges; Professional Training, Mentors

Ecosystem Connectors

Outsight (America-Israel chamber of commerce), Potential Investors; Mentors;

Businesses

Looking to hire

Communities

IT jobs; Tech companies; Businesses

Among Our Partners:

The Cob

The Cob is a platform designed to grow the business ecosystem by enabling its users to connect, learn and collaborate through groups and communities

Collaborate

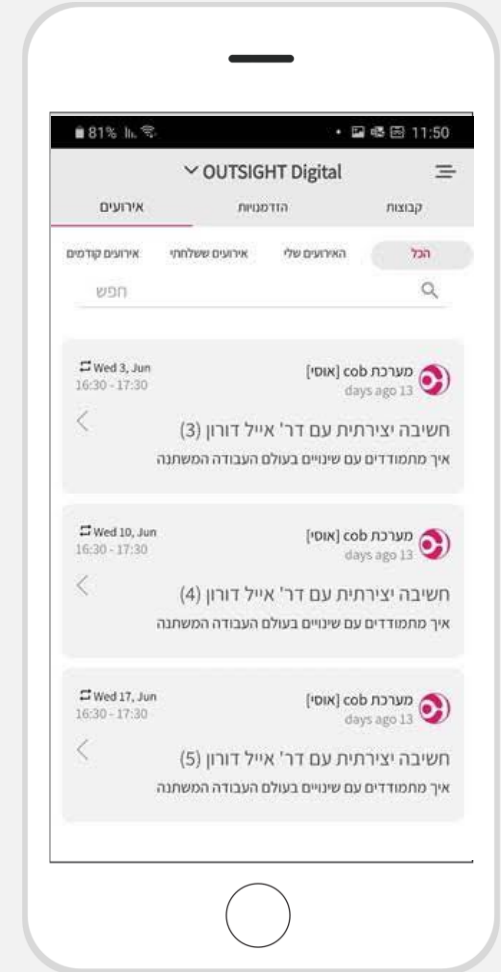

Learn

Connect

Share
opportunities

The Cob

Cob connects communities
to create an accessible,
proactive digital ecosystem

The Cob | Communities

What makes cob's communities different from other digital communities?

01

Business oriented,
filters relevant
information

02

Allows professional
groups to interact

03

Members cannot
share anything, only
relevant content

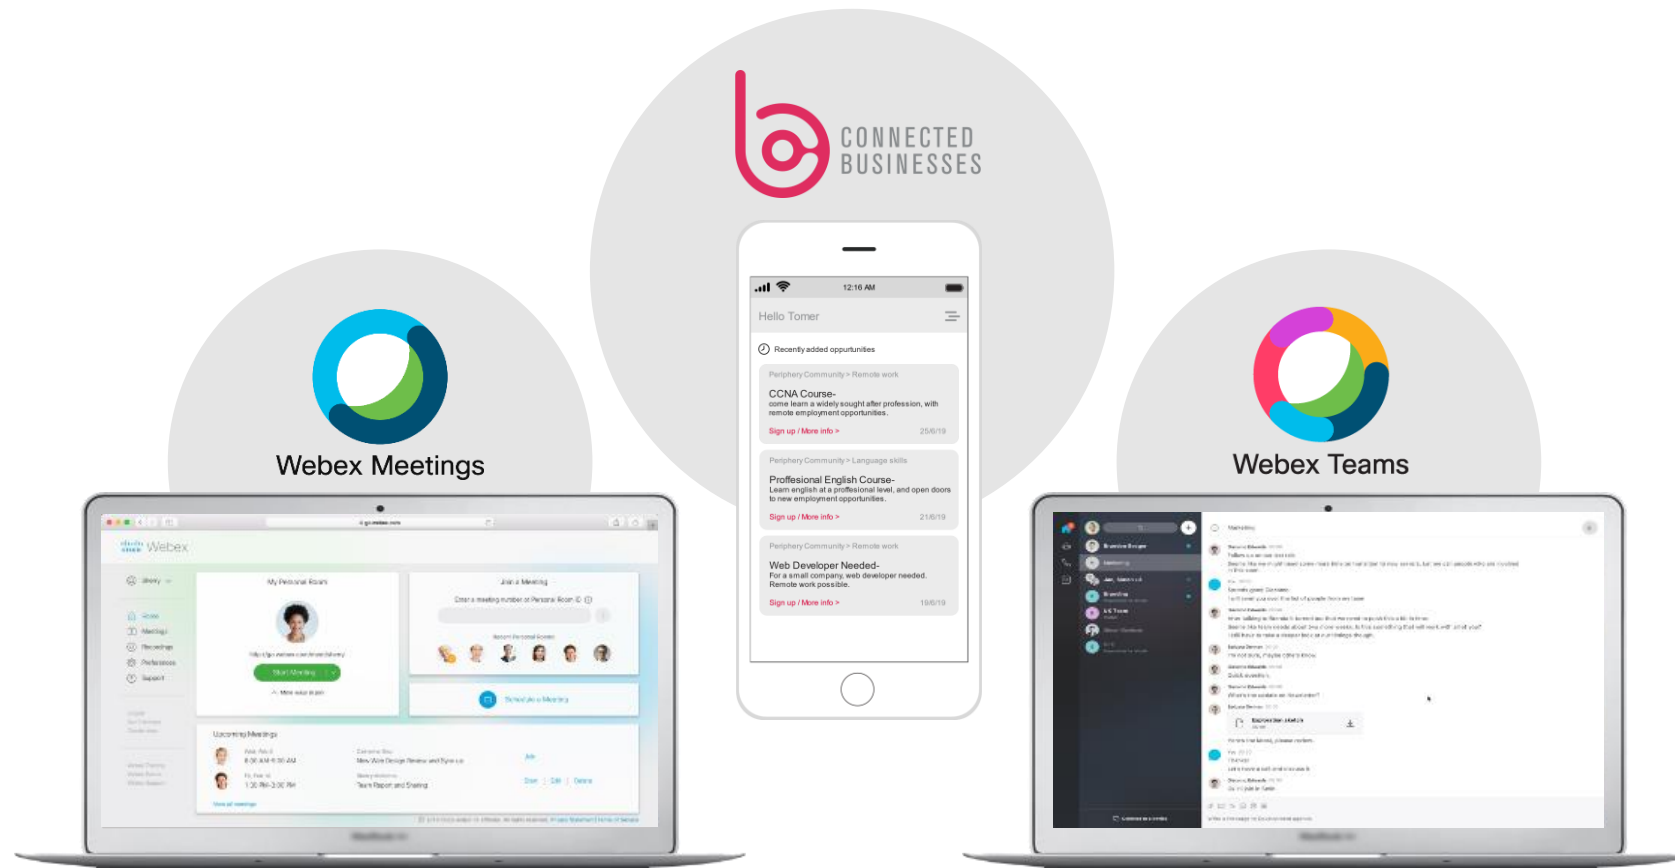

04

Proactive ecosystem,
which suggests
possible beneficial
connections

Cisco Collaboration Technology

Cisco Collaboration Technology - Webex Meetings & Webex Teams provides a secure & effective communication platform across communities

Content & Connections

Courses

Develop a career path
with your peers

Job offers

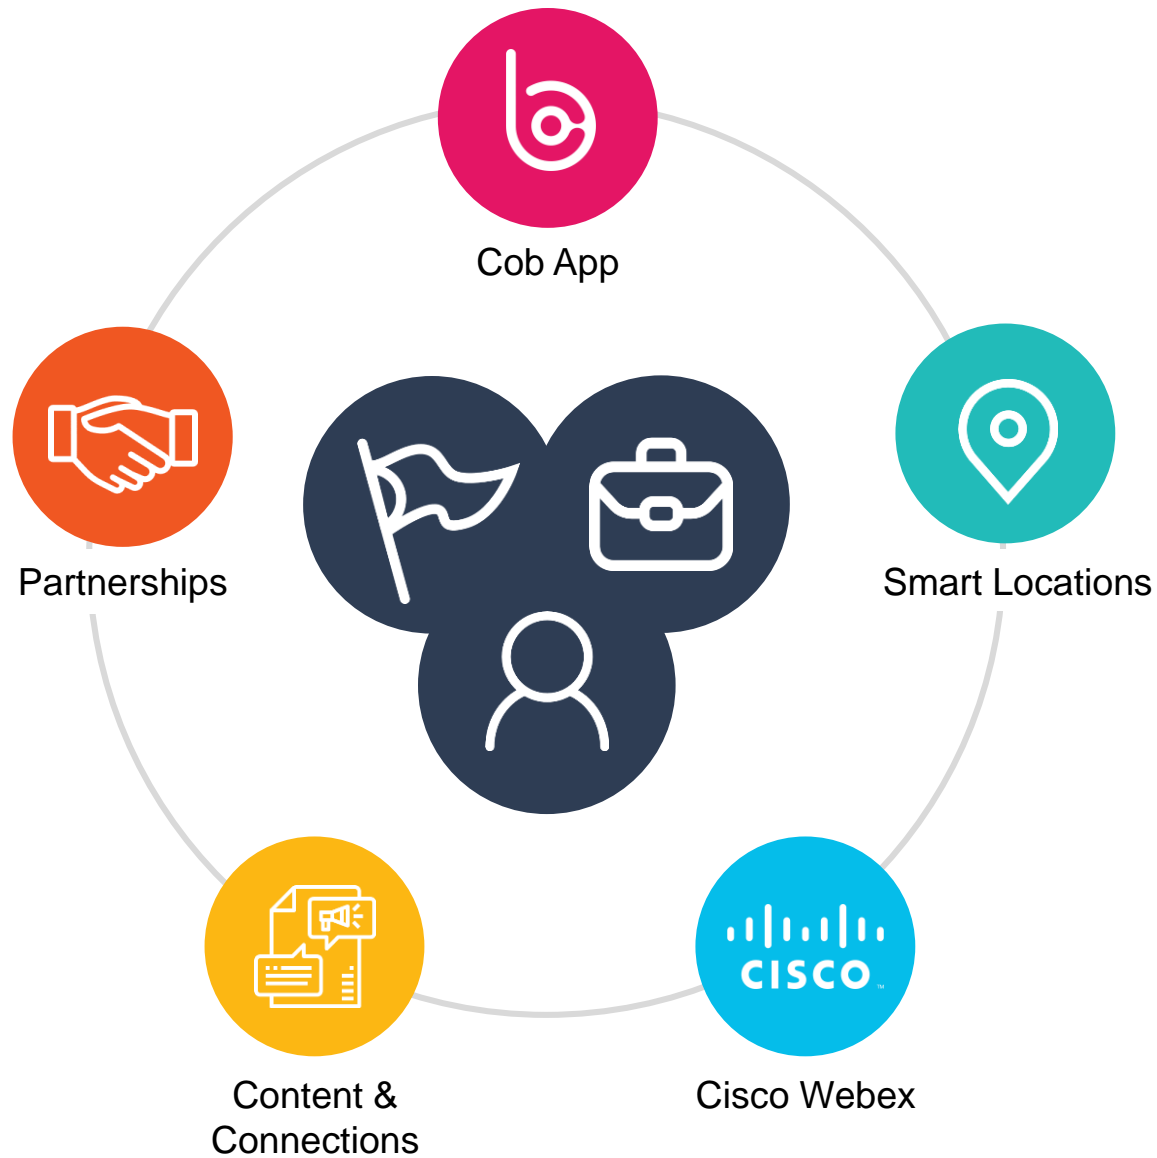

Open up to member
companies with open
positions

Mentors

Connect with mentors to
guide the way

What has this made possible?

What has this made possible?

Effective networking
between communities

Provides structure to
non-structured
organizations
(communities)

Smooth and natural
evolvment from
learning to working and
vice versa

Flexibility in the way
you learn

Much lower cost (25%
- 40% of course cost in
market)

Ability to learn in local
small groups in diverse
remote locations &
form a learning group

Access to high level
and useful courses
with teachers

Better and more
effective community
retainment

Example 1 — Klika

Klika community

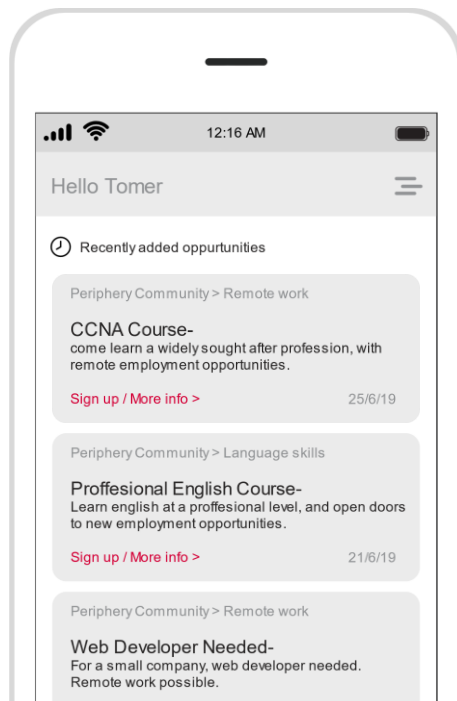

- Klika is a community entrepreneurs who are members of local digital hubs from across the country
- The Klika hubs enable members to meet, learn and work, in a digital friendly environment. In addition, the hubs serve as a venue for events such as talks, mentoring sessions etc.

Klika — CCNA Course Example

01

Klika members receive a notification about a CCNA course opportunity and sign up

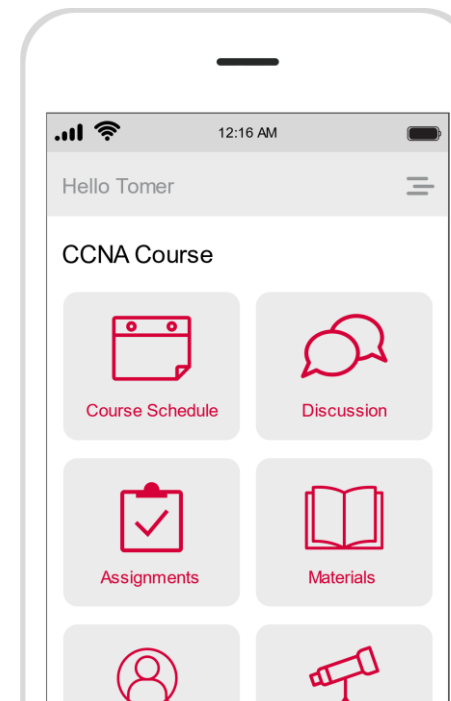

> 02

Students attend the course at their local smart location, while others attend remotely

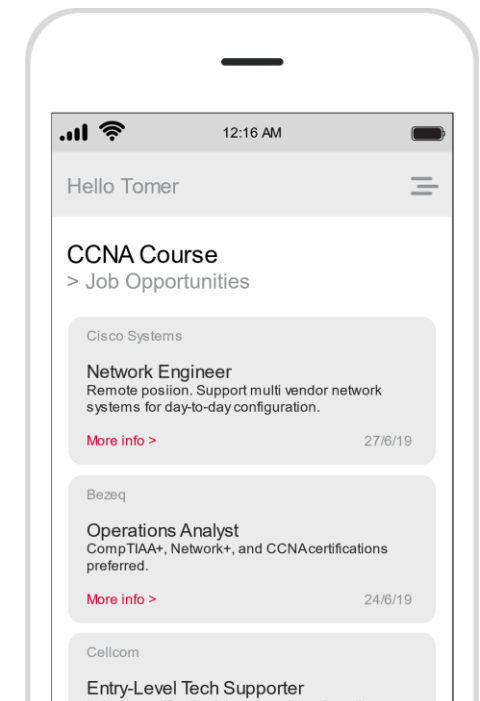

> 03

During the course materials are published and discussions are conducted on app

> 04

Companies interested in hiring offer employment opportunities to community leaders – who share opportunities with their community
